Alika Cooper

Having graduated from the California College of Arts and Crafts two years ago, artists Alika Cooper makes delicately evocative drawings on paper wood, and fabric. Her first UK exhibition, Hounds Tooth and Herring Bone, opens this week and is a joint show with fellow West Coast artists Kelly Jones and Marci Washington. Alika Cooper's work has appeared in a number of local galleries and is attracting attention for its emotional intensity and strength of composition. Juxtaposing memory and artefact, her paintings explore the poetics of desire, identity, and loss.
